

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Newly submitted/amended claims 30-32 and 35-40 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the subcombinations usable together where claims 24-29 and 33-34 do not require a retaining member with a biasing means in extended positions; whereas these claims do require a retaining pin having a head portion abutting the connecting pin, unlike claim 30-32 and 35-40 which do not require this element.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 30-32 and 35-40 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Allowable Subject Matter***

2. Claims 24-29 and 33-34 are allowed.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
